

# Traumatic Brain Injury Outcomes

## Our Average vs. National Average

DISCHARGE  
DESTINATION TO  
COMMUNITY  
(Greater is better)

76.1%

Our Average CMI 1.51

71.2%

National Weighted Average CMI 1.39

Our brain injury patients are discharged to the community more frequently than the national average. Medicare's definition of community included, home, personal care, and assisted living.

LENGTH OF STAY  
(Lower is better)

12.3  
days

Our Average

14.9  
days

National Weighted Average

In addition to having a greater % discharged to the community, as shown above, our program's brain injury patients have a shorter length of stay than the national average.

FIM GAIN  
(Greater is better)

41.6

Our Average

32.8

National Weighted Average

From admission to discharge, our brain injury patients gain more functional outcomes as compared to national weighted averages.

LOS EFFICIENCY  
(Greater is better)

3.73

Our Average

2.35

National Weighted Average

Our hospital produces a better score for efficiency compared to the national average – this is a direct reflection of higher quality of care, a more effective multi-disciplinary approach & greater strength in outcomes.

RETURN TO  
ACUTE CARE  
(Lower is better)

9.9%

Our Average

13.1%

National Weighted Average
